Maintain the Quality of Alberta's Crops

Better Seed means

Better Yields — Better Grades — Better Prices

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province, is urging the use this spring by farmers throughout the province of—

high quality, clean, treated, seed grain,

in order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by

1. Using registered seed wherever possible
2. Having seed tested for germination and purity
3. Treating seed for smut.
4. Thoroughly cleaning all grain intended for seed.
5. Seeding only varieties of recognized quality and varieties suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U. F. A. Locals, Boards of Trade, The Wheat Pool, Banks, Commercial Grain Firms, the Press, and many other organizations are working in cooperation with a

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers Association, The Alberta Seed Growers Association, the C.P.R. Agricultural Department and the University of Alberta.

D. A. McCallan, Provincial Publicity Commissioner, Edmonton, Secretary

Claresholm Local News

Miss Clara Edlund spent Easter with the home folks.

Mrs. Crummy entertained at bridge on Thursday evening.

Miss Margaret Coutts was home for the Easter holidays.

Mrs. Gilbert Gunderson was a patient in the local hospital this week.

Mrs. W. H. Blaney of Staveley was a patient in the local hospital this week.

Archie Harrison, of Pincher Creek, spent Easter holidays with relatives here.

Miss Beach, senior staff nurse at the local hospital, is on the sick list at present.

S. C. Williams is up from Portland, looking after his interests in the district.

Born, at the local hospital, on April 13, to Mr. and Mrs. Gustaf Radke of Granum, a son.

The local hospital is full up this week. Today there are 15 adult patients and 5 infants.

The Band dance on Monday night was well attended. The net proceeds were about \$100.00.

The first strawberries of the season appeared on the local market this week, coming from Lonsdale last.

The United church choir will give a recital on next Monday and Tuesday evenings, at the church.

Miss Hilma Tehtir, of Staveley, was operated on for appendicitis, at the local hospital on Saturday last.

Miss Margaret O'Neil, of Carmichael, was operated on for appendicitis, at the local hospital on Saturday last.

Flowers from outdoor gardens in Victoria and Vancouver have been enjoyed in the Claresholm hospital this week.

The trustees of Carnforth school district have extended the time for tenders on teacher's residence to April 19th.

Mrs. John Diebold is a patient in the local hospital. She is reported recovering satisfactorily from her serious illness.

Mrs. Godley entertained at bridge on Wednesday evening. W. Moffatt and Mrs. Buchanan were winners of honors.

The weather for the past week has been wintry for April, with snow flurries on several days, and frosty nights. Threshing has made fair progress during the week.

At a recent meeting of the officers of the Horticultural Society it was decided to order gladiolus bulbs for a first premium to each member of the society. Seven named varieties were chosen, representing a dollar to each member. By ordering in quantity a substantial discount has been secured. It is proposed to distribute these premiums at the first open meeting, to be held at the end of the month. Each package will contain one Crimson Glow, one Evelyn, one Kirilund, one E. J. Shayler, one Louise, one Majestic, one Marshal Poch, one Souvenir, and one unknown extra.

DISTRICT COURT SITTINGS

JUDICIAL DISTRICT OF MACLEOD

At Claresholm—

Thursday, May 3rd.

Thursday, October 4th.

Thursday, December 6th.

Sittings open at 2 o'clock p.m.

All sittings open at 10 o'clock a.m. except where otherwise stated.

GEORGE B. HENWOOD,

Deputy Attorney-General.

TOWN COUNCIL MEETING

Council met on Thursday evening in postponed regular session. Present: Mayor Ringrose, Councillors Arnestad, Morrow, Watt, Wyatt and Hood.

Rev. Harlow an C. A. Catts interviewed the council on behalf of the Board of Trade to ascertain what the council is willing to do in connection with establishment of better auto camp ground. Council stated that the matter had been under consideration and would be further considered.

G. Erickson submitted a proposal to build a camp, including kitchen, cabins, etc. if council would let him use the lumber from the old rink, install water and gas, and give him a lease to run it. Council promised consideration, and a committee was appointed to look into the matter.

Motion was carried to sell lots 17 to 24 in block 83 Plan 147N to John J. Bell.

A committee including Councillors Hood, Maxwell and Arnestad, was appointed, to scrutinize and pass on all building permits. An application for the purchase of a lot was made on behalf of Mrs. Ferguson. The matter was left in the hands of Councillor Hood.

Motion was carried to give Fred Palmer lots 11 and 12 in block 8 Plan 147N, in payment for services which he rendered to the town as construction inspector of the rink.

A price of \$30 for the two lots was set on lots 9 and 10 in block 84, on inquiry of T. Bernard.

An application was made on behalf of the Claresholm Garage to lease from the town lot 18 in block 4 with a view of using the lot as a storage place for old cars. The deal was left with Councillor Hood.

C. O. Arnestad interviewed the council re public liability insurance, and was asked to submit rates. Mr. Arnestad also brought up the matter of wind storm insurance on the rink building, and was authorized to place a \$7,000 policy at a premium of \$140 for three years.

Motion carried to grant \$50 to the baseball club.

The matter of exchanging lots with Lee Altie in order that he may have his house moved on account of the open ditch and water surrounding his place was discussed. Motion carried that the town give Mr. Altie lots 18 and 19 in block 8 in exchange and grant him \$150 toward the expense of moving his building.

Notice was given that the Court of Revision would sit on the 19th at 8 p.m.

Motion carried to give Bylaw 252, to appoint Dr. A. G. McMillan Medical Health Officer, but reading. The bylaw was passed.

Hospital accounts presented at a previous meeting were tabled for three weeks.

An account for board of an indigent was ordered sent to the provincial government.

The secretary was ordered to have sent back the serum for spinal meningitis that was brought down by Dr. Jenkins.

Accounts amounting to \$1732.18 were passed for payment.

Steps were taken looking toward placing an indigent, in poor health, in the Old Men's Home at Macleod.

TENDERS FOR TEACHER'S RESIDENCE

Sealed Tenders will be received by the Board of Trustees of Carnforth School District No. 1997 at the office of the Secretary Treasurer up to noon April 19, 1928, for the erection of a one roomed Frame Teacher's Residence. Plan and specifications may be seen and copied at the Review-Advertiser office. A marked cheque for five per cent of the amount of tender should be enclosed with each tender as a guarantee that the same is bona fide. The lowest or any tender will not necessarily be accepted.

Alex W. Thompson,

Secretary-Treasurer.

P. O. Carnforth. Nearest station, Granum. Miles distant 10½.

Sweet Clover a Good Friend But a Bad Master And Must Be Kept Under Control

Like fire, sweet clover is a good friend but a bad master. After a hectic career of about 15 years it has risen from a place of universal condemnation as a dangerous weed, to one of the most popular crops in the country with many men, on sandy land particularly, making a fortune out of the seed. Fifty cents a ton and more a bushel it was planted widely all over Eastern Canada and made much headway in the West. Then a few years after it was the defects of sweet clover began to show up and it sank in popular esteem until today the markets are loaded with seed and farmers cannot get more than two dollars a bushel for it.

Go into any of the five Dominion Government Seed Laboratories, scattered across the Dominion, and you will find that sweet clover pollutes most samples of other crops. In alfalfa. Seedmen will tell you that scores of good red clover, alfalfa, and alfalfa seed producing crops have been ruined by this weed, because it is a weed when growing with other crops, which comes up with the other clover, goes to seed at the same time, and because the seed of sweet clover is about the same size and weight as that of the others. It is very difficult and sometimes impossible to separate it. Moreover, although once widely boomed as a hay crop, it is now generally admitted that sweet clover and alfalfa is a much better plant for this use.

But again, like fire, sweet clover has a very real place in Canadian agriculture, if it is handled properly. At the Government experimental farms there is no such thing as a bad clover, because it is kept under control. Even in seed producing districts it can be grown, though the big seed buyers warn growers against the risk. As fertilizer, alfalfa, summer pasture and weed smotherer, sweet clover has a very real place in agriculture and its qualities in these respects, it will probably always be a boon to Canada, although no one expects to see big profits from it again. There is no market for sweet clover in Europe and being a big yielder of seed and a good pasture plant both here and in United States, there is no possible chance of a recurrence of the boom period, and for the sake of the good qualities of the plant, it is well that these days do not recur. When seed prices for it were soaring the crop was planted everywhere and the seed was under control and the reaction which followed the appearance of its defects more than offset the advantage of its recent popularity.

But the secret of growing sweet clover is to prevent it from going to seed. Too much emphasis cannot be laid on this point. The seed must be sown early and cut before it commences to go to seed. If used for pasture it must be kept grazed closely or the stock will turn to something else and the clover will be used coming up in other crops later on as a weed. It must be scarified before sowing so that every seed will germinate or else some of the harder seeds will lie over one, two or even more seasons germinating later and polluting the crop coming on in them. In special seed growing sections, such as Peel County, where alfalfa is a major crop, or in the Elgin or Marquette alfalfa districts in Ontario, or in the Brooks alfalfa area of Alberta, seed experts advise growers not to touch sweet clover at all. The risk is too great of it getting mixed with the alfalfa, alfalfa, or other clover and spoiling the quality of the crops produced. If these growers found that together and profit sweet clover in these special sections altogether, it would be a good protection. At all events they should insist that no threshers which have been operating in districts where sweet clover is grown should touch their own crops as the machines will carry sweet clover seeds and mix some with the seed of alfalfa and red clover of all three. If grown from good stock on a clean field, will always be worth money, but where handled properly sweet clover has a place as fertilizer, silage or a weed smothering crop.

Pauline: "And shall I return your letters?"
Fred: "Yes, there is some good material in them I can use again."

Who Won the War

Sir Harry Lauder gave Best Answer To Question

The old question of who won the war was asked by the Brampton Free Press in its editorial column. In this connection, we can recall a story told by Sir Harry Lauder at a reception given in his honor on a tour of Canada some years ago, according to his story, when asked as to his opinion, he replied as follows:

"You wanted my opinion, and here it is: I want to tell you that English and the Irish, the Welsh and the French, the Belgians and the Yankees, the Australians and the New Zealanders and the South Africans," helped the Scots' uniforms to win the war.

Probably the famous Scottish humorist was not far wrong in his estimation of the situation, and the arrangement of the various nations can be changed to suit the nationality of the individual.

Almond Industry Profitable

Many Varieties Are Cultivated On Island Of Majorca

Almonds have a prominent place on the table, but few people realize the great trouble taken in their cultivation. They are the most important crop of the island of Majorca, where many varieties are cultivated, and the industry is so prosperous that no old olive trees die they are replaced by almonds. When the almonds are almost ripe they are knocked off the branches by long bamboo poles and then picked up by women and children. The nuts are separated from the husks after drying, and the shells are then broken by hand or machinery and the kernels extracted.

Ranching In B.C. Improves

Outlook Is Better Than For Many Years Says Old Operator

The cattle business of British Columbia is beginning to hit its old stride again, and the outlook for the ranches is better than for many years, according to C. G. Cowan, operator of some of the large ranches in the Cariboo, including those owned by the Marquis of Exeter, Lord Egerton of Tatton, and the Cariboo Trading Company.

Ever since the boom years of the war British Columbia's cattle business has languished. The province's enormous productive capacity has been curtailed very little as there was practically no competition in the selling market. Now, however, Mr. Cowan states, the situation is entirely changed. Competition has come for B.C. cattle and has come to stay.

The upward trend in market conditions will result in large expenditures on ranch improvements. Several thousand additional head of cattle will be brought in, and as a side-line, 2,000 head of sheep will be imported by Mr. Cowan alone from the range of Oregon. Irrigation ditches will be built on many of the larger ranches to provide greater facilities for feed production.

Trying To Collect Back Taxes

Federal Government Claims Arrears From Western Wheat Producers

The controversy between the Federal Income Tax Department of Ottawa and the Western Wheat Pool may result in amount, aggregating millions of dollars, being collected by the Treasury for arrears in tax payments.

The point at issue is whether or not the pool or three cents per bushel which the pools deduct, for the purpose of marketing elevators, and grain handled should be treated as taxable income.

The Federal Department claims the pools pay up for all collections made since their inception. Many millions of dollars have been collected by the pools in this manner, and the latter have never shown these reductions as taxable income.

There are 4,400 country grain elevators in Western Canada, one-fifth of which are owned or controlled by the Canadian Wheat Pool, the largest farmers' co-operative organization in the world.

Canada's Copper Industry

Dominion Rapidly Climbing To Third Place In Production

That within the next 10 years Canada will become the world's third largest producer of copper, being thus surpassed in this field only by the U.S. and Chile, was the prediction made by Sydney J. Cook, chief of the metallurgical and chemical branch, Dominion Bureau of Statistics, Ottawa, during an address on Canada's future in copper, given at the annual general meeting of the Canadian Institute of Mining and Metallurgy in Quebec.

Mr. Cook said that although Canada now produces only about five per cent of the world's output of copper, enormous increase in production will be possible through the development of the newer fields that are just now coming to the front, such as the Hough district in Quebec, the Frodo mine area near Sudbury, in Ontario, and the several copper properties in Manitoba.

The speaker foresees no diminution in the per capita consumption of copper, but rather the probability of a larger increase in the use of this metal.

H.B. Railway Possibilities

Coast Line Of Hudson Bay Greater Than That Of Canadian Coast Line

Few people realize the immensity of the territory which will be opened up for development with the completion of the Hudson's Bay Railway. The shore line of the Bay itself for example, is greater than that of the Canadian Atlantic coast line.

With a coast line of these proportions the contiguous country, at present barely scratched by those pioneers of commerce, the surveyors and the prospector, should be large enough to yield a good business for a new railway line, apart from shipping of wheat and perhaps livestock for export trade. Fur, fish, minerals, pulpwood and agricultural products—all or any of these may be available in sufficient quantity to make the new line pay its way in a very short time without the heavier traffic for which the line is being primarily built—primarily, at least, from the viewpoint of the Western Canadian rancher.

The possibilities of the Hudson's Bay Railway are greater than perhaps even the most discerning can yet see—Baskatchewan Farmer.

Correct answers given next week. See how many you can answer by that time.

ANSWERS TO LAST WEEK'S QUESTIONS

435. What Are Kilocycles and Wave Lengths?
- A meter is 39.37 inches. Radio waves, regardless of length, travel with the speed of light; that is, 186,264 miles a second, approximately. 300,000,000 meters. Frequency, or cycle, means number of waves sent out each second. Kilo means 1,000. A kilocycle is 1,000 cycles, or waves. 550 kilocycles means 550,000 cycles, or waves, each second. If a wave is 1,000 meters long there will be 300,000 such waves each second, which means a frequency of 300,000 cycles, or 300 kilocycles. To obtain meters (wave length) divide 300,000 by number of kilocycles to obtain kilocycles divide 300,000 by number of meters.

436. Carrier Wave and Modulation?

A broadcasting station sends out waves of uniform frequency, known as "carrier wave", for example, 300,000 cycles per second. Sound frequencies of 40 to 4,750 per second cover range of ordinary speech and music. To transmit a sound of 2,000 frequencies a second on a carrier wave of 300,000 cycles, we simply make every 150th carrier wave stronger than its fellows, thereby making a frequency of 2,000 strong waves each second. This is accomplished by means of the modulator, a transmitting device whereby the weak microphone current automatically modulates, or varies, the powerful transmitting current.

437. Who Makes Most of Our Scientific Discoveries Nowadays?

While many scientific discoveries and inventions have been the result of some genius struggling alone in poverty, our greatest discoveries today are the products of organized research. A host of men, ample equipment and long and patient scientific experiment to build up the structure of knowledge, with staffs of assistants for detail work, is our surest road to discovery and invention. We do have the genius in science, but much work is often necessary before laboratory discovery or the brilliant intuition of the inventor, developed by extensive and costly experiments, can be applied to the practice of the farm or factory.

438. What Is Research Work?

To industrial research, which applies to industry the truths wrested from nature by the science workers, is due the credit for mass production, elimination of waste, improved processes of manufacture. For example, cracking of oils has doubled available gasoline supply; service life of auto tires doubled; development of dyes, perfume bases, flavors and photographic chemicals of coal-tar origin sufficient for many kinds; artificial silk and leather production and transmission of electrical power; insulation, dynamite and bakelite from waste sawdust, etc.

439. Amount Spent for Research Work?

America is spending approximately \$200,000,000 annually for industrial research; now considered so vital to successful production that more than 1,000 concerns have organized research divisions with thousands of workers, spending 1 to 3 per cent of gross receipts for this purpose. 70 trade associations and numerous colleges and technical schools also engage in research, while the services of the great Bureau of Standards, Washington, with its staff of 800 experts, is at disposal of any manufacturer or producer. A great public utility corporation spent \$13,000,000 for research in 1926, a single company spent \$5,250,000.

440. Who Pays for American Highways?

Entirely aside from the great convenience, recreation and health improvement afforded by good highways, they eventually pay for themselves in decreased hauling costs and vehicle upkeep and increased mileage per gallon of gas. The U. S. federal government supplies approximately 10 per cent of the road funds in that country; state governments 37 per cent; local governments 53 per cent. Special federal and state vehicle taxes (about \$26 per car) about equals the current charges of the highways on which they operate. About half of highway expenditures comes from special and property taxes. Costs have been still further distributed by a general issue of bonds.

441. Amount Spent on American Highways?

About 4 per cent of general tax receipts (local, state and federal), or one and a half billion dollars annually, is being used for highway building and maintenance, exceeded only by expenditures for education and public peace. Under Federal Aid Road Act about \$80,000,000 is expended annually towards the development of a network of about 190,000 miles of highways which will eventually connect practically every city of 5,000 or over—30 per cent of population will live within 10 miles of a Federal Aid Road. States provide sums not less than those supplied by the federal government. Some states extend assistance to counties in a manner similar to the Federal Aid system.

442. Stage Coach Days Are Coming Back?

Yes, in a way. The stage coach is being revived for the purpose of carrying tourists and sightseers to the most interesting spots in the country.

443. Number of Buses in U. S.?

There are about 10,000 buses in the United States.

444. Size of the New York Hudson River Bridge?

The bridge is 1,575 feet long and 100 feet wide.

445. Amount of World's Developed Horse Power?

The world's developed horse power is about 1,000,000,000.

446. How Much Do the People of the United States Spend for Diamonds?

The United States spends about \$100,000,000 annually for diamonds.

447. Precations S. African Diamond Mines Take Against Theft?

The mines take various precautions, including the use of armed guards and the installation of electric fences.

448. How Diamond Smugglers Work?

Smugglers use various methods, including the use of small boats and the concealment of diamonds in food and other goods.

449. Amount Spent for Research Work?

America is spending approximately \$200,000,000 annually for industrial research; now considered so vital to successful production that more than 1,000 concerns have organized research divisions with thousands of workers, spending 1 to 3 per cent of gross receipts for this purpose. 70 trade associations and numerous colleges and technical schools also engage in research, while the services of the great Bureau of Standards, Washington, with its staff of 800 experts, is at disposal of any manufacturer or producer. A great public utility corporation spent \$13,000,000 for research in 1926, a single company spent \$5,250,000.

450. Who Pays for American Highways?

Entirely aside from the great convenience, recreation and health improvement afforded by good highways, they eventually pay for themselves in decreased hauling costs and vehicle upkeep and increased mileage per gallon of gas. The U. S. federal government supplies approximately 10 per cent of the road funds in that country; state governments 37 per cent; local governments 53 per cent. Special federal and state vehicle taxes (about \$26 per car) about equals the current charges of the highways on which they operate. About half of highway expenditures comes from special and property taxes. Costs have been still further distributed by a general issue of bonds.

451. Amount Spent on American Highways?

About 4 per cent of general tax receipts (local, state and federal), or one and a half billion dollars annually, is being used for highway building and maintenance, exceeded only by expenditures for education and public peace. Under Federal Aid Road Act about \$80,000,000 is expended annually towards the development of a network of about 190,000 miles of highways which will eventually connect practically every city of 5,000 or over—30 per cent of population will live within 10 miles of a Federal Aid Road. States provide sums not less than those supplied by the federal government. Some states extend assistance to counties in a manner similar to the Federal Aid system.

452. Stage Coach Days Are Coming Back?

Yes, in a way. The stage coach is being revived for the purpose of carrying tourists and sightseers to the most interesting spots in the country.

453. Number of Buses in U. S.?

There are about 10,000 buses in the United States.

454. Size of the New York Hudson River Bridge?

The bridge is 1,575 feet long and 100 feet wide.

455. Amount of World's Developed Horse Power?

The world's developed horse power is about 1,000,000,000.

456. How Much Do the People of the United States Spend for Diamonds?

The United States spends about \$100,000,000 annually for diamonds.

457. Precations S. African Diamond Mines Take Against Theft?

The mines take various precautions, including the use of armed guards and the installation of electric fences.

458. How Diamond Smugglers Work?

Smugglers use various methods, including the use of small boats and the concealment of diamonds in food and other goods.

459. Amount Spent for Research Work?

America is spending approximately \$200,000,000 annually for industrial research; now considered so vital to successful production that more than 1,000 concerns have organized research divisions with thousands of workers, spending 1 to 3 per cent of gross receipts for this purpose. 70 trade associations and numerous colleges and technical schools also engage in research, while the services of the great Bureau of Standards, Washington, with its staff of 800 experts, is at disposal of any manufacturer or producer. A great public utility corporation spent \$13,000,000 for research in 1926, a single company spent \$5,250,000.

460. Who Pays for American Highways?

Entirely aside from the great convenience, recreation and health improvement afforded by good highways, they eventually pay for themselves in decreased hauling costs and vehicle upkeep and increased mileage per gallon of gas. The U. S. federal government supplies approximately 10 per cent of the road funds in that country; state governments 37 per cent; local governments 53 per cent. Special federal and state vehicle taxes (about \$26 per car) about equals the current charges of the highways on which they operate. About half of highway expenditures comes from special and property taxes. Costs have been still further distributed by a general issue of bonds.

461. Amount Spent on American Highways?

About 4 per cent of general tax receipts (local, state and federal), or one and a half billion dollars annually, is being used for highway building and maintenance, exceeded only by expenditures for education and public peace. Under Federal Aid Road Act about \$80,000,000 is expended annually towards the development of a network of about 190,000 miles of highways which will eventually connect practically every city of 5,000 or over—30 per cent of population will live within 10 miles of a Federal Aid Road. States provide sums not less than those supplied by the federal government. Some states extend assistance to counties in a manner similar to the Federal Aid system.

462. Stage Coach Days Are Coming Back?

Yes, in a way. The stage coach is being revived for the purpose of carrying tourists and sightseers to the most interesting spots in the country.

463. Number of Buses in U. S.?

There are about 10,000 buses in the United States.

464. Size of the New York Hudson River Bridge?

The bridge is 1,575 feet long and 100 feet wide.

Here and There

Work on the Royal York, new hotel of the Canadian Pacific Railway in Toronto, is ten days ahead of schedule and there is now every probability that it will be completed by May 1, next year. It will tower 335 feet above the sidewalk, being the tallest building in the British Empire.

A. Allerton has been appointed general manager of hotels and banquets camps east of Port William, operated by the Canadian Pacific Railway; and H. F. Mathews, general manager of hotels and banquets camps from Port William to the Pacific. The appointments were consequent on the death of C. E. Fisher, late general passenger traffic manager of the railway.

Faile Hald, 15-year-old Danish boy, who is travelling round the world in 46 days, passed through Montreal and the east of Canada recently on his way to Vancouver, whence he will sail by Canadian Pacific All-Red route to Yokohama.

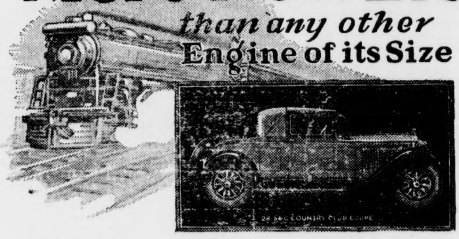

Port William, Elevator capacity at Port William will probably total 100,000,000 bushels by 1930. Present storage capacity of the twin cities is recorded as 72,500,000 bushels and between 8,000,000 and 10,000,000 bushels will be added before the 1928 crop is garnered. Expansion in the following two years will take about 20,000,000 bushels, one of the largest terminal building projects either in the history of the lake-head ports or any of the other centres of the continent.

Winthrop—So many applications have been received from farmers in Manitoba to engage the services of youths who are being sent out from Great Britain under the Boy Immigration scheme that the Provincial Government has requested the authorities to increase the number from 50 to 100. Hon. Albert Prentiss, Minister of Agriculture, stated that 175 farmers have filed applications for help. It is expected that the first crop of young immigrants will reach Manitoba late in March.

Substantial reductions in express charges on packages up to 15 lbs. in weight originated in Europe and with Canadian destination have been announced by the Canadian Pacific and Canadian National Express companies. The rate for a 15 lb. package as \$1.77 and for the purpose of the Canada Express, which holds the record for all Canada in the production of milk and butter, is a three-year-old. She is owned by J. O. Harvey in the northwestern part of the city, and a letter from Ottawa advises that the production of this cow has never been equaled in Canada. Gladys No. 20,000 produced 10,204 lbs. of milk and 204 lbs. of butter fat in a test extending over three years. She is now being shown her test as a four-year-old and averaging about 65 lbs. of milk a day.

How To Begin Keeping Bees

Department of Agriculture Will Supply Good Advice For the Beginner

Canada is a good country for the beekeeper, as nearly everywhere there grow an abundance of nectar-secreting flowers and the climate is generally favorable to honey production. At the same time successful beekeeping does not require the expenditure of much time and consists chiefly in knowing what to do and when to do it. Often, however, prospective beekeepers are at a loss how to begin, they would do well to get the bulletin on "Bees and How To Keep Them," available at the Publications Branch of the Department of Agriculture, at Ottawa. The best time to begin according to the bulletin, is in the spring. One or two colonies will be enough as it is a little task to launch out on a large scale until some experience is acquired. Colonies complete in form and ready to be obtained in May, and as early as April in British Columbia, or else swarms may be procured during June or early July. A second generation is obtained in the early spring will, with proper management, give a good crop of honey and a new colony increase. Swarms, however, unless early, are not likely to produce much honey the first year. The colony or swarm should be strong and healthy, headed by a young and fertile queen and the apiary from which it comes should be free from disease. If possible, be procured from a nearby apiary. If colonies are purchased it is very desirable that they should be in modern hives. Another method of buying bees is that providing highly satisfactory is by weight, without combs, in boxes especially constructed for the purpose, but before doing this the necessary laws and accessories should be on hand. Those desiring advice as to where bees may be procured should write to the secretary of the provincial or local beekeepers' association, or consult the advertising columns of the bee journals.

Fertilizers For the Corn Crop

A Phosphate Fertilizer May Be

The most satisfactory fertilizer for corn is barnyard manure. In using manure, however, according to a new Dominion Department of Agriculture bulletin on "Manures and Fertilizers," it may be found advantageous to add a phosphate fertilizer such as superphosphate. When the supply of manure is limited or the soil is poor, the bulletin recommends a complete fertilizer in which phosphoric acid and potash predominate. On light sandy soils either a heavy application of manure or a complete fertilizer with a fairly high content of potash is necessary. A number of formulas for corn crops on different soils are suggested in the bulletin. For well manured lands and clay lands, 300 pounds of superphosphate is recommended. On similar soils where the manure supply is limited, 60 pounds of nitrate of soda, 40 of sulphate of ammonia, 40 of muriate of potash, and 300 of superphosphate is suggested. The formula given for well manured sandy loams is 25 pounds of nitrate of soda, 25 of sulphate of ammonia, 40 of muriate of potash and 30 of superphosphate, while for such soils with little manure the number of pounds of the first three ingredients are raised to 60, 60 and 100 respectively.

Extremely respectable old lady, perceiving the untidy behaviour of an intoxicated gentleman — "Dear me! How gauche!"

Intoxicated gentleman, affably — "Splendid, thank-you, goddess, it was you?"

A professor of a Chinese University claims that a working knowledge of Chinese can be obtained in three months.

"You should have been born a man, my dear."

"So should you!" — Journal Amusements, Paris.

Hatching Dates

Chicks Should Be Hatched During First Three Weeks of April. Chicks should not be hatched too early because, besides the difficulty of caring for them during severe weather, they will start egg production too soon and exhaust a certain amount of their strength by the time they are ready to come, with the result that they will often go into molt and stop laying.

Investigations have been made at Stations with the object of determining the best times to have chicks hatch when the pullets are to be used for egg production during the winter months. The results of the tests show that the general purpose breeds such as Plymouth Rocks, Wyandottes, and Rhode Island Reds should be hatched in April, preferably in the first three weeks of the month. A week or two later will do for the smaller and more rapidly maturing Mediterranean breeds such as Leghorns and Anconas. Pullets hatched at these dates will have time to properly mature before the latter part of October when egg production should begin.

In tests conducted at the Lenoireville, Quebec Experimental Station, over a series of years, general purpose pullets hatched between April 5 and 15 gave a considerably larger average profit per bird than those hatched between May 1 and May 15.

Penny Growing

Can Be Successfully Grown In All the Provinces

The penny is a very popular flower, and as it is one of the hardest of ornamental plants, it can be successfully grown in all the provinces. The wonderful range of form and color of the flower is ornamental throughout the growing season. Very few insects or diseases affect the penny and its culture is easy. The latest report of the Dominion Horticulturist gives complete directions for the growing of this beautiful flower. It blooms best when planted in clay loam, but succeeds on a wide range of soils if the drainage is good. It should be planted where there is as much as possible bright sunlight and at a distance from trees whose roots run through the ground. When planted in the spring they should be situated as early as possible and not too deeply. The crown or dormant buds should not be set more than three inches below the surface. They should be kept well cultivated at all times.

These Changing Times

It is a far cry to Manitoba's pioneer days. Forty-nine years ago A. E. Howe made the 130 mile journey from Winnipeg to Seattle by coast in 21 days. Recently he made the journey from the Manitoba capital (to confer with his lawyer) to the west in less than an hour and a half.

The average man has 24 pounds of carbon in his body.

A scientist has discovered that earthworms produce musical sounds and that they moan when hurt.

WORLD HAPPENINGS BRIEFLY TOLD

The London Daily Mirror says that John L. Baird, inventor of television, intends to test his apparatus by transmitting to an aeroplane in the near future.

The Turkish Government announced that it has accepted the League of Nations invitation to participate in the preparatory conference for the limitation of armaments.

Several vermicular papers appear to believe there is some truth in a report that Japan is negotiating with the Soviet for concessions in Siberia and the exploitation of the resources of North Manchuria.

Twelve Bristol aeroplanes, bought in Great Britain for use by the Mexican air force, have arrived at Vera Cruz. Two other planes were sent on approval and, if satisfactory, more will be ordered.

The Saskatchewan Daily Post announces that to date the board has decided to acquire elevators at 80 cents. Tenders for the construction of 47 of these elevators were accepted recently by the executive.

Mrs. Mercedes Gleitz, London typist, abandoned her third child, a twin, in the Straits of Gibraltar when within a mile and a quarter of the African coast. The rough seas and unfavorable currents were blamed for her failure.

Alexis I. Hykoff, president of the council of commissars, reports that all difficulties in purchasing grain for Russian towns have been surmounted and that the government expects to purchase 4,000,000 tons before the first quarter of the year has ended.

The first university course in aeronautical engineering in Canada has been inaugurated at the University of Toronto by the faculty of applied science and engineering, and has been given the approval of the board of governors and the senate of the university.

The federal government is not exempt from the Workmen's Compensation Act, and neither are any of its ministers. It was ruled in a Quebec court, when Ernest Riel successfully sued the deputy minister for negligence, that the federal government is liable for injuries sustained while at work on behalf of the government.

It Will Prevent Uteral Threat. At the first symptoms of sore throat, which precedes the onset of inflammation, take a spoonful of Dr. Thomas' Electric. Add a little sugar to it to make it pleasant. It will allay the irritation and prevent the absorption and spreading of the poison. Those who were periodically subject to uterine trouble made themselves immune to attack.

Good Yields in Irrigated District. An average of 33.7 bushels of wheat per acre was produced on the Lethbridge (Alberta), Northern Irrigation District in 1927, the total being 1,097,780 bushels on 60,061 acres. The total value of all production in the district, including grain, fodder crops, dairying and poultry, is \$2,658,265, an increase with \$1,228,000 in 1926. The increase in production in three years has been over 500 per cent.

Plane Transport In Alberta. Passenger, Mail and Freight Service Between Calgary and Edmonton. The commercial airplane transport projects are being developed in Calgary. One calls for the use of biplanes carrying 12 persons each, to be used principally for passenger, freight and mail traffic between Calgary and Edmonton. The other calls for lighter machines, two or three passenger, for Calgary-Edmonton and mountain trail purposes.

Aluminum possesses qualities of lightness, cleanliness and protection against rust and dust which make it incomparable as a container for fine tea. You will never find that flat, stale taste in Red Rose Tea, because it is put up exclusively in damp-proof aluminum packages.

Losing Zest For War. Germans Now Prize Peace Says Noted Biographer. Germany, whatever her alliance may be, will do all in her power to remain neutral in any war that may assail mankind in the far or immediate future.

Emil Ludwig, noted biographer, expressed himself at Orestera Hall, New York.

It will henceforth prize peace, he said, for three reasons:

"First, because the royal prerogative to decree war does not exist now as long as he lives."

"Second, because Germany has the greatest percentage of women to day who are disbelievers in war."

"Third, because they realize they will be better off by remaining neutral."

Former Field Marshal von Hindenburg, declared Ludwig, will be rejected president of the new republic as long as he lives.

"There are no symptoms of a return to the monarchy," he said.

On the contrary, since we are governed by the old conservative families, the republic is safer than before.

When the citizen sees the Kaiser's old field marshal, he is reminded of the old constitution, he says.

"There are no symptoms of a return to the monarchy," he said.

Aviator Crashed Into Sea. British Pilot Killed While Making Air Speed Record. Flight Lieutenant S. M. Kinkead, noted British speed pilot, flying at terrific speed, crashed into the sea at Southampton, England, leaving no trace, while attempting to break the world speed record.

Lieut. Kinkead, who was a member of the Victoria British Schneider cup team of last year, was piloting the biplane type of aircraft with which Flight Lieutenant S. M. Kinkead won the Schneider trophy with an average of 281 miles an hour.

Lieut. Kinkead made his first trial flight in a Royal Air Force "wonder plane," and then had his second flight after which he declared he was convinced he would make more than 300 miles an hour.

The machine that he used was a supermarine Nipper 252. During the Schneider cup races, Lieut. Kinkead made a speed of 281 miles an hour, the highest rate attained over water in the race, but was forced to withdraw after completing the third lap.

The record which the British aviator sought to shatter was that established shortly after the Schneider cup races by Major Mario De Bazzani, Italian speed ace, who flew at 268.91 miles an hour.

ARE PALE PEOPLE WELL? Some pale people are well, but not many. Pale people usually notice this blood. When, in addition, you are unable to sleep, or have indigestion, or feel after slight exercise and you perhaps show symptoms of indigestion and nervousness, there is no doubt about it. You are in an anaemic condition.

Dr. Williams' Pink Pills are the logical remedy for this. They begin at once to build up the thin blood, strengthen the nerves, increase the appetite and aid digestion. But do not wait too long. This blood is a part of your life.

If you will send your name and address to Dr. J. C. Williams, Medicine Co., Brockville, Ont., you will receive a free little booklet, "Building Up the Blood," and "What to Eat and How to Eat," both of which will be found very useful in the home.

Recipes For This Week. (By Betty Barakat)

QUICK SWEETS

1 cup flour.
2 teaspoon baking powder.
1/2 teaspoon salt.
3 tablespoons shortening.
1 cup milk.
1 cup melted butter.
4 tablespoons sugar.
2 teaspoons butter.

1. Sift together flour, salt and baking powder. Cut in shortening and add sufficient milk to make a soft dough. Roll 1/4-inch thick. Cut in 4-inch squares. Place a small amount of raisins in the centre of each, with one teaspoon sugar and 1/2 teaspoon butter. Weave the edges of the dough and water and fold over the various, pinning edges tightly together. Brush with milk and roll in remaining sugar and cinnamon which has been mixed together. Place 1/2 teaspoon butter on top of each sweet and bake in moderate oven (350 degrees F.), 15 minutes. Serve hot with lemon sauce made as follows:

1 cup sugar.
1/2 cup butter.
1 tablespoons flour.
1 tablespoon lemon extract.
1 cup boiling water.

Cream butter with sugar and flour. Add boiling water and boil one minute. Remove from fire, add lemon extract, and serve hot.

VEGETABLE PLATTER. Put or five cooked, well-battered and seasoned vegetables arranged attractively on a platter. Add some creamed vegetables, as potato, onion, cauliflower, form a satisfying and nutritious dinner. Add 1 to 3 tablespoons of butter to a cup of cold cooked vegetable.

SUN Cured Fire. The heat of the sun cured a fire in one of the windows of a jewellery shop in Sydney, Australia. The window was closed with toilet paper, in which material of a highly inflammable nature is used, and the heat of the sun caused the paper to become ignited. The photograph window was broken, and the contents of the window completely destroyed.

There is a small island off the coast of Ireland, which is inhabited by only fourteen families.

A fool can do more damage in a minute than a wise man can undo in six months.

What worries most Canadians is not so much what is afloat.

COULD LEARN FROM DENMARK. To Market Demands Says Langley. Denmark has many things to teach the Canadian Farmer, the chief of which is adaptation of production to market demands, according to George Langley, who recently addressed the Farmers' Forum, Regina, on "Denmark As a Trade Competitor With Canada." Mr. Langley has only recently returned from a trip with the Canadian Farmers' Party to England and Denmark.

"We must learn from the Danes," he said, "not to produce on our farm waste, we particularly like to produce, but to study the market and then concentrate on those things which are actually most wanted. In no other way can we ever hope to become real competitors in butter and bacon with the Danes in the British market."

Mr. Langley pointed out that the Danish agricultural high schools turn out "the most educated cultivator of the soil in the world," who outlined a two and a half year course for farmers, which included physics, chemistry, geology, soil science, biology, animal husbandry and animal breeding, and stated that this was in a large measure responsible for the great success of the Danes in the dairy industry, and the allied business of producing bacon for export.

"We have to create an entirely new system of education in Canada before we can hope to compete properly with the Danes," he stated.

"High inspection of milk, butter and all slaughtered pigs is carried out in Denmark, according to the speaker. No bruised carcasses are permitted to be exported from the country, and so the Danish reputation of producing the finest bacon is unimpaired."

Has Daughter As Partner. The firm of Marston and Daughton, in England, is not a partnership, employing a type of that nature. The firm of W. Davis and Daughton, further, has been doing business under the name of Marston, Ltd., since 1914.

Experiments have demonstrated that it is possible to grow certain hardy fruits on the prairies. If there is anything in a name, the Snow and Northern berry apple should be frost-proof.

Run It In For Lane Back. A break taking with Dr. Thomas' Electric Oil will relieve lame back. The oil will immediately absorb the oil and it will penetrate the tissues and bring speedily relief. Try it and be convinced. As the liniment enters the pain comes out, and there are ample grounds for saying that it is an excellent article.

According to the mathematics of relatively, an object moving toward the east moves faster and weighs less than one moving toward the west.

People who have no sense of humor act mighty funny at times.

Will Receive Five Millions. Canada's Share This Year From Germany Under Dawes Plan.

Total reparations payments by Germany this year will be in the neighborhood of \$600,000,000. Of this amount Canada will receive approximately \$5,000,000.

Canada receives roughly a shade under one per cent. of the total amount paid by Germany under the Dawes reparation plan. From the total of \$600,000,000 there are certain deductions which reduce the total amount available for distribution.

The electric unit known as the volt takes its name from Alexander Volta, who made the first voltaic battery.

The Right Soap For Baby's Skin. In the care of baby's tender skin Cuticura Soap is the mother's favorite. Not only is it unrivaled in purity and refreshing fragrance but its gentle emollient properties are usually sufficient to allay minor irritations and promote skin health.

CHAPTER XX.—Continued

"Do you think I would marry you to a decent boy—a boy of good family—who was foolish enough to think of marrying a foreigner of whom he knew nothing, and when the police knew considerable? Look!"

Helen looked over and scanned the paper. Her own picture stared at her. For a moment she forgot everything but the pleasant memories it brought to mind of Miss Abbie's house and its kindly shelter. The picture was taken in front of the house; she had worn her white midie and plaited skirt. She remembered now that Mrs. Wymuth had asked for a photo—it was one of the rules of the House.

"Helsinki Mander, young Finnish girl who escaped from the Girls' Friendly House. Arrested here a year ago in the worst Chinese den in the city." Helen read, and would have fallen had not Major Cornett's glance for her assistance and placed her in a chair.

"To you deny this?" asked the Magistrate, when he thought she was sufficiently recovered to speak.

"No," said Helen faintly, "that's my picture, but it's all a lie."

"Of course, they all say that."

"Well, at least you can understand that I was not anxious to marry you to young Dovan or any decent man."

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered milk-bottle Castoria. It is sweet to the taste, and sweet in the little stomach, and gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely at first sign of colic, constipation, diarrhoea, or those many ills when you just don't know what is the matter. For real sickness, call the doctor always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that, and always says Fletcher's. Other preparations may be just as fast, just as free from dangerous drugs, but why experiment? Besides, the baby on castor and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

W. N. U. 1725

Recommend Co-Operative Marketing Of Live Stock

Saskatchewan Overseas Live Stock Marketing Commission Makes Report

Co-operative marketing is the first of eight measures recommended by the Saskatchewan Overseas Live Stock Marketing Commission to the Legislature of Saskatchewan. The Commission was appointed early in 1924 by the Saskatchewan Agricultural Research Foundation and directed to make an investigation relative to the marketing of Canadian Live Stock in Great Britain and to study co-operative band factories in England, Ireland* and Denmark. The Commission was made up of five men who investigated conditions in the countries named and also in Poland, Germany and Holland.

The creation in Canada of a department or bureau of agricultural economics to study data on marketing and other problems is also recommended by the commission.

"Tough luck, Helen," said the nine boys. "But we all know it wasn't your fault. He fooled you—that's all."

Mrs. McManus found her tongue—never a hard task for her. "Well, one thing sure, Helen, you can't say I didn't want you. I knew it means no good to a girl when one of these city dicks starts to go with her. They mean no good to any girl. I tell you, a girl has to win her step all the time. I can't keep you here, I'd tell you on if I could, but there's so much talk of this and that the other; and I've always tried to run a decent home, but with so many comers and goers, and now that Mr. McManus has gone I've got to be more careful. I guess you'd better go into the city. There's so many people there no one asks questions."

Helen stood up and faced the sunset and her eyes were looking far away. She did not hear what Mrs. McManus was saying. She was thinking of that sunset long ago the night before she crossed the Canadian border—how it glowed and gleamed and beckoned. She had been so sure it was a welcoming fire to warm and comfort her. She had come here with hope and confidence, and now she was of making her way, and finding friends. But these fires, these friendly fires, where were they now?

Her friend whom she loved had not betrayed her into hostile hands. And now her Jack! As Aunt Lill kept saying, "It's a trick a prison, it's a trick."

"And God, her God, who had seemed so close and dear and loving to her, was he just a painted fire like the other morning, and now, now, when she came to him crying and shivering, bitterly alone, and afraid."

The last glow of color faded in the sky and the night wind came whistling, cold and piercing, down the mountain side.

Helen was aroused by the cold dog licking her hand.

Dead gardens, littered with sticks from which the life had fled and the bright blooms had departed, with all the sadness of the silent graves, deep shadows of life had been, hummocked over the newly earthed graves where the potatoes and turnips now lie buried, and the fields cleared out, deep clean and tidied away like the home of trouble where the neighbors gather and do this and that service for the one who is gone; faded stable where golden hue was faded now to match the lowering sky; leafless trees that drew their heads and limbs up like the toothless old women whose children have all forgotten them; no birds at all except the little graybirds who sing no song and whose color is the color of dust; the rose-hedges, gone, driven out by the recurring winds of December that force winter at any spot of brightness; weary winds that rage all day and mean at night as if they had repeated of their evil ways, but whose sorrow is only for the work of destruction which they were not able to accomplish. The trees, the animals, the things, all melancholy over all. So came that cold, gray, desolate time which we refer to as the "Turn of the Year."

There was only one hope for the old and old world, so gray and unlovely and lifeless—hope that the decent man would come with its soft whistling cheer to cheer the unlighted of the dead face. Surely there would be snow for Christmas.

There was a green Christmas tree, a full Christmas tree, the old people said grimly, but no one could truly call this a green one. It was only gray and leafless.

Keep Minard's in the Medicine Chest.

Over 2,500 acres of the area covered by Stockholm, Sweden, consist of parks and gardens.

On a Meat Diet

Stefansson Endorses To Demonstrate That Meat Does Not Cause Scoury

Viktor Stefansson, Arctic explorer, has thrived for two weeks on a meat diet, his physical condition improved in New York. The explorer is under observation at Bellevue Hospital, where he is endeavoring to demonstrate that an all-meat diet does not cause scoury.

Dr. Clarence W. Lieb explained that the explorer's general condition had remained excellent since he began the experiment, which will be continued another fortnight.

Hard and soft corns both yield to Holloway's Corn Remedy, which is entirely safe to use, and certain and satisfactory in its action.

Would Not Give Up

One-Armed Actor, Moulton Play With Wolf Left Hand

When Mr. Douglas Fox, the musician, had his right arm in the Great War, his friends thought he would never be able to play the piano again.

The gallant man determined that he would play and has developed so amazing a technique, that when he recently gave a recital in England, music critics said: "The first sensation in it was that of a single hand can cover the keyboard so effectively and do so much; but soon we forgot the limitations under which he is working, and think only of the delicate and thoughtful music he makes."

The man who gave this remarkable recital is now in the direction of music at Pasadena College, England.

His "Your cousin refused to recognize me last night. Think I'm not his son, I suppose."

Robinson Crusoe's Error

Survey Shows Juan Fernandez Island Is Veritable Paradise

Robinson Crusoe and his man Friday should have remained on their island. A recent survey of Juan Fernandez Island, on which Alexander Selkirk, the original Robinson Crusoe, spent four years, proves it to be a veritable paradise.

The report says it is one of the most fruitful spots in South America with every imaginable sort of plant growing there. A Frenchman, shipwrecked on the island some 40 years ago, has refused to leave because of the ease with which he has been able to live.

Fighting

For Nursing Baby's Health

Is the Constant Care of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments are a task a parent must be able to handle. A warning sign—the mother must be able to recognize it. That is unless she has a remedy in the hands of the many minor ailments of babies and children.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach, regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other harmful drug. Which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or better still, give him an occasional dose of the Tablets to ward off illness.

LOSES FAITH IN COMMUNISM

Dutch Engineer Is Disillusioned After Visit To Russia

The Conservative press of Holland is rejoicing in the repudiation of Communism by the Dutch engineer known at the time of his expedition from the Dutch East Indies last September as "the firebrand of Java," where he had been the head of the subversive Soviet movement.

After his expedition he went to Russia in order to learn at first hand the political and social principles he had been advocating. This visit, judged from the point of view of a long article he has written for the Nieuwe Rotterdammer Courant of Rotterdam, has resulted in his entire loss of faith in Communism.

He says he considers it his duty on his return to Holland to advise the population of the Dutch East Indies, whom he himself had directed along the path of Communism, to retrace their steps.

He found that the Soviet Government was able to do little for education and the care of the sick, despite all the fine slogans. As in capitalist countries all available money is spent of all spent on the army, and further on the enormous bureaucratic apparatus.

The incomes of farmers are very small. Nineteen of them have ten to twenty of 25 rubles per month. Only one-fourth earn more than that.

Even the casual visitor must be struck by the great masses of the large cities are miserably poor. The shabby clothing, the old, repaired furniture, the accumulations of dirt cannot possibly be kept concealed. Their nature is forced to confess, even of 1913. Anybody can see that.

In 1927 there were 2,000,000 employed in Russia out of a total industrial population of nearly 15,000,000.

Cause Of Asthma. No one can say with certainty exactly what causes an attack of asthmatic condition. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irritate except through a sure preparation such as Dr. J. C. Kellogg's Asthma Remedy. Undoubtedly there is no uncertainty regarding a remedy which has freed a general amount of asthmatic victims from the scourge of the bronchial tubes. It is safe everywhere.

Homebased Filings For January

Homebased filings in the four Western Provinces in January showed a total of 457 as compared with 543 for the same month of 1927. Manitoba recorded 51 as compared with 56 for January, 1927; Saskatchewan 194 as against 186; Alberta, 201, against 115, and British Columbia 11 against 6.

Winning Live Stock Shipments

During January 1296 car loads of live stock were handled at the Union stock yards, St. Boniface (Greater Winnipeg). The shipments comprised 1,000 head of cattle, 17,277 hogs, 17,418 sheep and 1,420 horses.

PHILLIPS' MILK OF MAGNESIA

Reduce the Acid

Stick stimulants sour stomachs and indigestion usually means excess acid. The stomach and nerves are over-stimulated. Too much acid makes the stomach contents sour.

Alkali helps acid instantly. The best form of alkali is Phillips' Milk of Magnesia. It is a natural, harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your stomach will be normal, and in five minutes. Then you will always know what to do. Trade and harmful irritants will never appear to you. Go before for your own sake. It may save you from many a serious illness.

Be sure to get the genuine Phillips' Milk of Magnesia. Beware of cheap imitations for 50 years in continuous use. Each bottle contains full directions—any druggist.

Christie's Biscuits

more delicious than you ever dreamed Sultana Biscuits could be

Acts Like a Flax.

That's why so many people buy Christie's Biscuits. They are so delicious and so healthy. You can't eat them without feeling better. They are the best thing you can eat for a change.

BUCKLEY'S

Meadow Creek News

Furries of snow and continued frosts and cold weather still hold back spring work. With a slight rise of temperature on the 10th, we had thunder and hail. What about the old saying "Just four months from thunder to frost"?

Mr. Cohen was on the Creek the first of last week arranging for bringing cattle down from Nanton. Hope Oliver went north to pick up an outfit and bring the cattle back. Corland Etherington and Bill Gray went along.

Alex Bell and R. Vachnas took in the Calgary Horse Show and Spring Bull Sale last week.

Johnny Speers was on the Creek this week looking for contract work.

Mr. John Oliver, of the Blair Knowe Ranch, now residing in Clareholm with his daughter Mrs. Sidney Lamb, was operated on at the Clareholm hospital last week. Reports indicate a very speedy recovery.

Mr. and Mrs. Robert Oliver, also past residents here, visited their father Mr. Oliver in Clareholm last week. When they returned to their home in Glenora they were accompanied by their daughter Miss Roberts, who has just graduated from the School of Agriculture.

Mrs. Travis Bagley from Victoria, formerly of Spring Valley Ranch, also paid her father Mr. Oliver a visit very recently.

F. C. Burton of Furman called on friends here on his recent trip south.

Notice re Syphons

Public Notice is hereby given that all SYPHONS being used for emptying cllars in the Town of Clareholm have been prohibited by order of the Town Council until May 15th, next.

This action was deemed necessary on account of the excessive amount of water in the soil this spring, and the citizens are urgently requested to co-operate in this matter and refrain from using syphons for the period above stated.

It is the intention that this order shall be enforced and the citizens are requested to govern themselves accordingly.

Dated at Clareholm this 23rd day of March, 1928.

Claude J. Amundsen,
Secretary-Treasurer.

IN MEMORIAM

C. Day
Days of sadness still come after us.
Tears in silence often flow.
Memories keep father ever near us.
Though he died a year ago.
Ever remembered by his loving
Wife, Son and Daughters.

HATCHING EGGS AND COCKERELS

Plymouth Rock, White Leg horn, and White Wyandotte. Wyandotte cockerels no kin to my previous stock. R. G. Dissert, Clareholm.

RYE GRASS SEED

Government tested No. 1 western rye grass seed. Free from noxious weeds. Germination 95 per cent. Sacked, \$8.00 per 100 pounds.—Gentry Oliver, Stavelay, Alta., Phone R406.

NOTICE

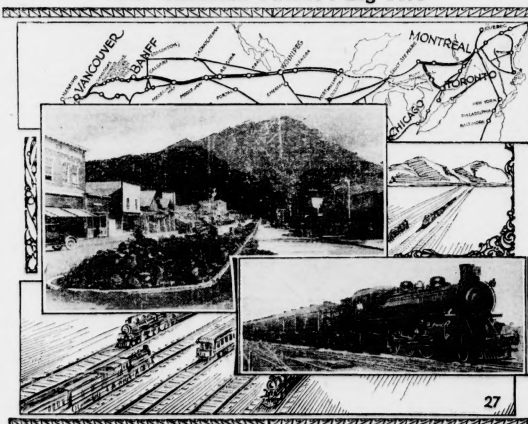

In the Estate of John Robert Chilton late of near Clareholm in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named John Robert Chilton, who died on the 28th day of December A.D. 1927, are required to file with the undersigned Solicitor for the Executor by the 25th day of May A.D. 1928, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

Dated this 29th day of March, 1928.

J. R. Watt,
Solicitor for
William Jay Chilton, Executor,
Clareholm, Alberta.

The Canadian Pacific's Big Five

1—Map showing the five cities where the trains will leave and arrive.
2—Banff, the connecting point for the Canadian Pacific Railway.
3—One of the giant engines to be used for these long runs.

When the Big Five, the quintette of trains to have to be operated by the Canadian Pacific Railway on express schedules from the east of Canada and from Chicago to the coast, make their initial runs, the dramatic spectacle will be presented daily of five great trains flying across the Dominion and all converging on the wonder district of the American continent, the Canadian Rockies, where snow-capped mountain peaks and beautiful valleys and lakes vie with another in attracting the gaze from all parts of the United States and the rest of the world.

The key train of the quintette will be the "Trans-Canada" which will take two others, "The Imperial" and "The Toronto-Vancouver" express

will have their runs entirely in Canadian territory. The balance of the five, "The Mountaineer" and "The So-Pac" will leave from Chicago for the Canadian Rockies and the Pacific coast and will consequently run partly through the United States. The "Trans-Canada" and the "Mountaineer" are all sleeping car trains. The "Trans-Canada" with a reputation throughout the world covers the 2585 miles between Montreal and Vancouver in 89 hours and 15 minutes. As part of its equipment it carries an open observation car between Calgary and Kamloops. This train starts on May 15. The "Imperial" and the "Toronto-Vancouver" express operating from the coast to Montreal and Toronto

respectively are both year round trains except for modified schedule. Finally, there will be "The Mountaineer" and "The So-Pac" running out of Chicago for Vancouver, B.C. The former will start its daily run to Vancouver on June 11 and the train will commence operation from the coast to Chicago on June 15. In this run ten hours will be cut off last year's figures the journey taking 73 hours as against 83 hours and 15 minutes last year. The "So-Pac" will leave Chicago on June 18 until August 30, and from July 2 until August 30 in the opposite direction. Both the latter two trains consist of all sleeping cars.

"It's these touches that make motor-ing a real luxury"

THE all-important details that contribute so much to motor-car luxury . . . touches of refinement, beauty and distinction . . .

you will find them in the New Series Pontiac Six.

From the smooth, powerful Pontiac Six engine to the rich, exquisite finishing of the Pontiac-Fisher bodies, you will discover in the New Series Pontiac Six, more direct evidences of superb quality than you ever dreamed possible at Pontiac's amazingly low prices.
